Codetrain Africa

FullStack Software development

PROFILE

Highly motivated and detail-oriented Junior Front-End Developer with beginner experience seeking an opportunity to contribute to a dynamic development team. Committed to expanding technical skills and delivering exceptional user experiences. Eager to apply theoretical knowledge gained through coursework and personal projects to real-world web development challenges.

WORK EXPERIENCE

One World Luxury Homes

I worked as a freelance developer to build the website of One World Luxury homes which is a luxury apartments company located at Airport hills.

Nativen Inc.

I was contracted by Nativen Inc. which is a startup company to be a front end developer of their team and helped with the building of the Ui of their website project.

HotPlate

I built the website for HotPlate which is a restaurant.

PERSONAL PROJECTS

I've built a lot of personal projects through the years. Some of them were collaborations and others i did by myself. List of some of my projects include;

- DepRelief - A web application where users who are depressed get surveyed and are directed to Group chat spaces where they get to discuss their issues with other users just like them and hopefully heal together.
- UniSave - A mobile app for University students to save their money more.
- E-clinic - A web application built to target hospital employees and help them with the assessments of informations of the patients that come into the hospitals using the app. etc.
